

UNITAS GLOBAL

ENTERPRISE HYBRID CLOUD

Bringing harmony to Hybrid. Get your IT in sync with our fully integrated Hybrid Cloud Solutions.

DEDICATED CLOUD INFRASTRUCTURE

GLOBAL Unitas Global hosts our clients' infrastructure in a location that is best for their business. We are committed to deploying in any data center facility our clients need us in - globally.

PRIVATE All network, hardware and software are dedicated to a single client, providing the security and dependability needed for mission critical applications.

AGNOSTIC: Using OpenStack as a common framework, we are able to deliver fully agnostic solutions that integrate with legacy technology. Independent from any hardware or software company, we truly support a multi-vendor approach.

SECURITY We architect solutions to fit client security requirements. Our reference architectures have evolved to incorporate secure data messaging, encryption, and physically separated tenants. Our highlighted security features include:
Encryption
Tenant separation
SOC2, ISO 27001, HIPAA
Compliance

HYBRID CLOUD FLEXIBILITY

01 SIGNIFICANT COST SAVINGS for predictable workloads in private infrastructure, with the ability to use on-demand resources for short-term or burst requirements.

02 SINGLE USER INTERFACE when spinning up and sharing workloads between AWS, Azure, Google CP, private, and on-prem cloud environments.¹ Utilize private cloud where it makes sense and public where it makes sense—all from one place.

03 SECURE, HIGH-PERFORMANCE CONNECTIONS— provide virtualized, private direct connections that bypass the Internet to provide better security and performance with a range of bandwidth options.

04 ON-DEMAND, AUTOMATED CONNECTIVITY to clouds—our portal and APIs simplify the process of provisioning and managing connections to multiple cloud services and networks.

CLOUD REPORTING

1 | REAL-TIME VISIBILITY
of assigned resources and accrued costs, as well as the ability to scale up or down according to budget and resource requirements.

2 | SHOWBACK / CHARGEBACK
Clearly communicate cloud costs to business units, projects, and executive management.

3 | FULL MONITORING & MANAGEMENT
Single pane of glass visibility provides full insight to comprehensively manage the health and performance of the hybrid cloud environment.

4 | CAPACITY PLANNING
Intelligent insight into cloud usage patterns provides high utilization and more accurate resource planning.

5 | SPRAWL ON LOCKDOWN
Identify orphaned entities and underutilized assets to reduce sprawl.
