UNITAS GLOBAL

ENTERPRISE PRIVATE CLOUD A PRIORITY.

EPC is the combination of dedicated IT infrastructure and modern cloud technology.

By melding multiple facets of IT (data center, network, compute, storage, software, operations & management) into a single, secure, end-to-end solution, Unitas Global can deliver your private cloud environment as a monthly service.

HIGHLIGHTS

GLOBAL
With access to over 130 of the top data center facilities worldwide, Unitas can host your infrastructure in a location that is best for your business.

CUSTOM
Because we are technology agnostic, we provide a solution designed to best fit your IT and legacy application requirements.

SECURE
Since we build dedicated environments from the ground-up, we're able to implement each client's specific security requirements.

DEDICATED
All network, hardware and software is dedicated to a single client, providing the security and dependability needed for mission critical applications.

SCALABLE
Our dedicated private cloud solutions can be designed with the necessary headroom to anticipate your growth. Hybrid cloud solutions and management are also available.

SOLUTIONS

INFRASTRUCTURE
We custom architect, procure, deploy and manage a truly private infrastructure solution to best fit our clients' needs—from data center, network, compute, and storage, all through Unitas Global.

UNITAS ATLAS®
The EPC infrastructure is then wrapped in Unitas Atlas® our unified monitoring platform that provides you with full insight to comprehensively manage the health and performance of your IT environment, as a service.

END-TO-END SLA
We back your EPC with an end-to-end SLA that guarantees application uptime. Our Cloud Management Center operates 24x7x365 to provide real time managing and monitoring of your IT environment.
