

# MANAGED PUBLIC CLOUD

Flexible, On-Demand, Managed: get the resources you need, when you need them.

Public cloud provides easy access to resources on flexible terms as clients need them, eliminating the need to build and maintain infrastructure. The leading cloud providers also offer a variety of on-demand platform services (such as databases) further reducing operational burden. And, of course, public cloud is scalable which allows for growth without the need to plan long upgrade cycles.

## FEATURES

### FLEXIBLE

Scale up or down as business needs change without contract lock-in.

### INNOVATIVE

The latest technologies are offered first in public cloud, shortening the time required to take advantage of them. New services are announced regularly.

### CUSTOM

One size does NOT fit all in public cloud. Just as with physical infrastructure, there are many vendors and technologies to choose from.

### MANAGED

Managed and maintained 24x7x365 by Unitas Cloud Management Centers for complete peace of mind.

### SELF SERVICE

On-demand instant provisioning via our easy-to-use portal.

### MONITORED

Monitoring and management from the Unitas Atlas™ single pane of glass dashboard provides total visibility.

### SECURITY

Unitas cloud security experts design a custom public cloud security solution based on your organization's requirements.

### GLOBAL

Available worldwide, in nearly 200 partner data centers or in your own.

# MANAGED PUBLIC CLOUD

## NEXT-GENERATION PUBLIC CLOUD MANAGED SERVICES

While public cloud services have made it easier to consume resources than with traditional legacy infrastructure, this ease of use presents new challenges relating to management, cost control, quality assurance, and adherence to best practices.

TRADITIONAL MSP	NEXT-GENERATION MSP
General focus on "run and operate"	Design, architect, automate, optimize
Hardware-based solutions	Cloud- and software-based solutions
Centralized operations and resources	Distributed operations and resources
Device-based SLAs	Solution- and application-based SLAs
Complex, manual change management	DevOps, CI/CD self-healing solutions, infrastructure as code
Static monitoring with fixed thresholds	Dynamic monitoring, anomaly detection, machine learning
Security risk mitigation	Security by design, continuous compliance
Outsourcing vendor	<i>Trusted advisor and partner</i>

### PUBLIC CLOUD TECHNOLOGY

Unitas Global has a dedicated team of Cloud Solution Architects certified in the technologies present in each cloud provider who make recommendations and create architecture designs taking advantage of these unique capabilities based on each specific use case..

### WHY UNITAS MANAGED PUBLIC CLOUD?

Every use case is different. By allowing our team of experts design and architect the best solution for your use case, you can focus on your company's specific business requirements. Unitas Global's Managed Public Cloud offering provides distinct benefits over a DIY approach.

### TRANSFORMATION & ADOPTION

Unitas Global offers a variety of professional services to help with cloud transformation and adoption:

- Cloud Advisory & Strategy
- Cloud Adoption Services
- Containers & Microservices Architecture
- DevOps Enablement
- Application Migration
